

DESIGN STATEMENT - ff-g-rfb-compliant

18 Frenchs Forest Road East, Frenchs Forest (fictional) (Zone R3; Site G, Frenchs Forest Precinct)

The proposed three-storey residential flat building provides four dwellings over a basement car park. The massing is deliberately modest, respecting the prevailing two-to-three storey streetscape while providing a consistent street wall.

A high standard of architectural design, materials and detailing will be achieved: a boardmarked weatherboard palette with natural stone base, a deep entry reveal, and generous permeable paving. Mature trees are retained and the roof form steps down toward the rear boundary.

The applicant submits that the development exhibits 'design excellence' within the meaning of clause 8.5 of the Warringah Local Environmental Plan 2011 and that all site-specific requirements of Part 8 of that Plan are met.

(Synthetic document - fictional. Statements are the applicant's own and are not independently verified.)
